

Condensing Flue Kits

Firebird Products Ltd offer a comprehensive range of plastic and stainless steel condensing flue kits to complement the extensive range of oil-fired boilers. A flue is a critical part of boiler installation and a necessary requirement to remove gases created during the combustion process. A correctly installed flue will also ensure the clean and efficient operation of the boiler, resulting in optimum boiler performance and a longer design life. An incorrect installation will result in the boiler warranty becoming invalid.

!
NB: Only Firebird-approved flue kits and accessories may be used on Firebird boilers. Use of unapproved flue kits may invalidate the boiler warranty policy.

Plas-Fit Plastic Flue Kits & Accessories

Suitable for Enviroblue™, Enviromax™ and Envirolite Condensing Boilers

Firebird was the first oil boiler manufacturer to introduce plastic flue kits to the UK market. The Plast-Fit range of plastic balanced flue kits provides flexibility, ease of installation and an aesthetically pleasing high-quality finish. Available in both Low Level and High Level options, the Plas-Fit flue kits are suitable for use with the **Enviroblue™ Enviromax™** and **Envirolite** range of boilers in outputs from 12kW to 35kW.
