

With energy prices soaring it's time to switch to a high efficiency Firebird condensing boiler.

Trust The Experts

- For over 40 years Firebird, Plymouth UK, headquartered in Co. Cork, Ireland, has been a global leader in designing and manufacturing high performance solutions for the home heating market.
- With a clear focus on sustainability, Firebird has invested heavily in developing products with increased fuel efficiency, reduced emissions and products that use more renewable and sustainable fuel sources.

Here's How

Speak to your Installer/Service Engineer about making the switch.

Use the **sales rep. finder tool** on our website to find a Heating Engineer in your area that stocks Firebird boilers.

heating bill

Costs

Makes financial Sense

Firebird Envirogreen Condensing Boilers are **25%–30%** more efficient than a Standard Efficiency Boiler.

Here's Why

- With an efficiency of **97.5%**, Firebird Envirogreen condensing boilers use less fuel than a standard efficiency boiler, therefore reducing energy costs.

The Most Efficient Boilers on the Market

Cost savings with Firebird

This table shows the savings you can make when you upgrade from a standard efficiency boiler to a Firebird condensing boiler, based on a 4 bedroom home.

House Built	Region	Standard Efficiency	Condensing Boiler	Saving
1980s	NI/UK	£3545	£2602	£943
2006	NI/UK	£1971	£1343	£628

Go Green Without Costing the Earth

- When you upgrade your standard efficiency boiler to a high efficiency Firebird condensing boiler you are taking positive action to tackle climate change.
- Firebird boilers are **HVO Ready**. Hydrogenated Vegetable Oil is a fossil free fuel, and when used in domestic settings can make these homes almost carbon neutral immediately. This could be used as a substitute for Kerosene.
- Firebird boilers are the kindest to the environment with **ultra low NOx** emissions as low as 60mg/kWhr, half the EU limits.
